### PROJECTS

#### Crypto Dash Board

- Responsive Design:** Designed a responsive crypto dashboard that adapts to various devices and screen sizes.
- Customizable Components:** Developed reusable and customizable components using Chakra UI's modular approach, allowing for easy maintenance and updates.
- Dynamic Behavior:** Implemented dynamic and responsive behaviors in components using Chakra UI's responsive hooks, such as `useBreakpointValue` and `useMediaQuery`, to create a seamless and interactive user experience in the crypto dashboard.

#### Villa Website UI

- Responsive and Interactive Design:** This Villa Interactive designed website for purchasing villas were made using React JS and Framer animations to create an engaging user experience .
- State Management and Data Sharing:** Effective State management and data sharing between components using React Context API and Hooks.
- Dynamic Interesting:** Dynamic and engaging content was created using React Hooks e.g. `useCalback` and `useMemo` and Framer Animations, providing a rich and immersive experience for users looking for and buying a villa in on the website
